## New Argus **500** watt remote control projector

... Shows **35mm** and **127** Slides

... with more brilliance than ever!

Sit back . . . relax . . . push a button—and see your favorite 35mm or 127 color slides bigger and brighter than ever.

The new Argus 500 is especially designed to show your favorite color slides in their best light—life-size even in a small room . . . with push-button ease.

Slides are safer in an Argus 500, too. Aluminum magazines keep them free from dirt and scratches. And a powerful blower keeps projector and slides cool during longest showings. Silently, too . . . there isn't even a whisper from the blower.
